Gary:

Thank you. Per your assessment, TRC Companies is qualified to perform the work required by the removal AOC. As we discussed this afternoon, as well, Rafael will complete his assessment of the qualifications of TRC to perform the remedial work required by the RI/FS AOC during the next 4-5 days.

Gloria:

I am satisfied with the expertise they have demonstrated through their project team and project experience. I would like for them to restart removal action work as quickly as possible recognizing the enforcement related activities yet to be decided in the Region. On the removal activities, I would like the PRP to focus its attention on completing the removal of all materials from all tanks, piping, and equipment as well as decontamination or demolition of these tanks, piping, and equipment to prevent rainfall from collecting and creating additional waste materials. This work must be completed no later than June 30, 2011. Additionally, I want all other aspects of the Removal Action completed and closed out on or about December 31, 2011. All aspects of the Removal AOCs remain in place and they should immediately begin submitting monthly updates beginning in March 2011.

Thanks

Stephen:

Thank your for the attachments relating to the qualification of TRC Companies to perform the work required by the AOCs with NORCO. Rafael Casanova and Gary Miller will evaluate the attachments and contact you with any questions or comments.

Subject: TRC Superfund Qualifications

Gloria,

Please accept the attached document (TRC Superfund Quals) as a means of demonstrating that TRC has the experience to serve as the Project Coordinator for the Falcon Refinery Superfund Site. Also I've attached a generic description of our services.

In addition to the listed Superfund Sites in the main document, we are also working at the Phoenix Goodyear Airport-South Superfund Site, I included a brief description of that project.

I have many additional documents that demonstrate our capabilities, please call if you have any

questions or would like additional information.
